

INFORMATION ABOUT OUR LATEST PROJECT

Project Cityliner – Emission free passenger transport

STS Cityliner

Now we are working on this project emission free passenger transport.

The Cityliner is an electric vehicle for passenger transportation with latest technology. The lithium polymer batteries care for a range of 200km with 1 charge.

Depending on the equipment the 3 coaches have 45 seats, standing room for 20 persons and an entrance for disabled also

Air suspension, heating system, air-condition and pneumatic doors cares for a comfortable trip.

All coaches have four wheel steering and ensure so easy drive and handling.

The electric-drive can be designed for a range of 200km and the max. speed is 25-40km/h.
